EXPERIENCE

FacilitEASE, Capstone Project, Quezon City

Aug 2024 to Nov 2025

- Structured and drafted key sections of a research study, coordinating revisions across team members to finalize manuscripts and ensure clarity.
- Designed and updated visual aids, including tables, charts, and figures, to improve data presentation and support findings in reports and presentations.
- Tested and reviewed developed programs to verify functionality, identify and resolve bugs, and ensure data accuracy and integrity.
- Automated data-processing workflows using scripting to reduce manual steps, improve reproducibility, and increase team efficiency.

Web Developer, Highly Succeed Inc., Mandaluyong City

Dec 2025 to Present

- Develop and maintain responsive, user-focused web applications using HTML, CSS, and modern JavaScript practices to deliver polished front-end experiences.
- Optimize front-end performance, accessibility, and cross-browser compatibility to improve usability and reliability.
- Collaborate with designers, QA, and stakeholders to translate requirements into functional features and iterate based on feedback.
- Use Git-based version control and deployment workflows to push updates, troubleshoot issues, and support production releases.
- Built an enterprise employee management system to centralize employee monitoring and streamline administrative workflows.
